Re: Metal and Inks

This letter is to confirm that the inks you purchase from Quality Inks & Rollers do not contain lead, mercury, chromium, antimony, cadmium, or anthraquinone. Please feel free to call me if you have any questions at 602-268-4199.

Thank you,

Jeff Ashton

Dear Anita,

Thank you for your request relative to the Consumer Product Safety Improvement Act of 2008 (CPSIA) as it relates to Domtar paper products.

It is Domtar's position that our paper products are only intermediary products and therefore we are not required to perform testing to demonstrate compliance to the CPSIA. We have no idea at the time of sale of our paper products if they will be used for "ordinary books" or for products considered to be "designed primarily for children 12 years of age or younger". We believe the vast majority of our products to be employed in the former category.

However, in order to help you issue a general conformity certification as provided in the CPSIA regulations, we can confirm that our products do comply with the CONEG model legislation; namely, that the sum of the concentration levels of lead, cadmium, mercury and hexavalent chromium present in these products do not exceed 100 ppm by weight. On that basis, our products are well within the required limits for lead that is required by the CPSIA.

Our products do also comply with the phthalates restriction within the CPSIA based upon representative and reasonable product testing for the six phthalates of interest (DEPH, DBP, BBP, DIDP, DIPN, DnOP).

This response to your request for support in meeting the requirements of this new regulation is provided in an effort to provide you with the most current regulatory information as they relate to Domtar paper products. As the position of the CPSC is clarified, we will continue to monitor the situation, in support of your valued business.

If you have further questions, please direct those questions to your Domtar sales representative.

Sincerely,

Howard Hunter
Manager, Technical Services and Development
Domtar Paper Company, LLC

TRANSILWRAP COMPANY, INC.

Manufacturers and Precision Converters of Plastic Sheet and Film since 1931

Dec 3, 2007

RoHS : Heavy Metals

Transilwrap Transkote ® Clear PET MR, KRTY, FG, MITY, Clear and Matte OPP MR and Digikote Clear PET Laminating Films are produced with materials from different suppliers that have certified in writing that the materials furnished to Transilwrap do not contain any Elements above RoHS maximum concentrations.

This includes designated metals (Lead, Mercury, Hexavalent Chromium, and Cadmium), brominated flame retardants (PBB, PBDE) and Plasticizers (DOP,DEHP, DBP).

We believe this information is the best currently available on the subject. It is subject to revision as additional knowledge and experience is gained, Transilwrap makes no guarantee of results and assumes no obligation or liability whatsoever in connection with this information.

Introduction

Superior performance. Superior aesthetics. Tango Advantage delivers both. Unsurpassed in its proven reputation for outstanding runnability, printability, and consistency on press and through converting. Add in high brightness, clean-white styling, and an ultra smooth surface and Tango Advantage becomes the preferred choice for any printed application where quality matters.

Product Features

Superior Runnability

Ultra Smooth Surface

Clean-White Styling

Quality Tactile Feel

Fade Resistance

Benefits

Outstanding ink holdout, side-to-side uniformity, sheet cleanliness and consistency mean print jobs that optimize productivity and exceed customer expectations.

With the smoothest print surface in its category, Tango Advantage C2S delivers a visual aesthetic that denotes high quality. Full, double-coating on both sides ensures a quality image front to back.

A distinctive clean-white styling delivers crisper colors and sharper contrast while maintaining optimal color fidelity on press to produce eye catching graphics that demand attention.

Unique fiber mix and finishing process result in high stiffness for a finished piece that feels as good as it looks.

Color fast dyes provide fade resistance for shelf life and color integrity.
